

1010-402-8

16 September 1966

MEMORANDUM FOR: Executive Director - Comptroller

SUBJECT: Alternatives to the Construction of a New NPIC Building

1. The DDI was asked in your memo (and attachment) of 24 July to submit to you by 20 September a study of alternatives to constructing a new building for NPIC. This was directly related to the question of whether or not the Director would defer requesting in the FY 1968 budget construction funds for a new building.

2. The DDI asked me to take action to meet your request; your request was related to an Agency-wide assessment of a report being prepared by the Joint Imagery Interpretation Review Group (JIIRG).

3. In view of the fact that it has already been decided not to seek construction funds in the FY 1968 budget and because space for NPIC is a problem directly related to questions under study by JIIRG, a study of alternatives as requested would best be deferred until after completion and approval of the JIIRG report and a determination of its effect on future needs for NPIC space.

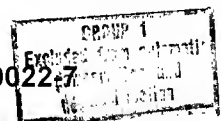

4. The intention is to form a small Agency task group, following approval and implementation of the JIIRG report, to make the fullest possible study of space needs for imagery exploitation under Agency direction.
